Business Broadband

Businesses with multiple users and a high utilization of the Internet prefer to have an always "on" access to the Internet. Our Business Broadband internet service enables you to avail the advantages of high speed Internet access, with multiple IPs on a single link to the Internet.

With high-speed access to the Internet, not only will you be able to transfer information at a much higher speed, but you would also keep your telephone lines free. Etisalcom offers various internet packages from Broadband to ADSL internet service.

Business applications can be reliably accessed from your main or remote offices, voice-over-IP applications can be accommodated, thus reducing monthly operating expenditure.

The service also includes a range of diversity /backup solutions, term discounts, simplified billing and in many cases account management for the establishment of a solid partnership in delivering and maintaining your telecommunication needs.
