BUSINESS SOLUTIONS

Collocation

CONNECTIVITY, REDUNDANCY, AND SECURITY

Key benefits to your business

- Keep critical internal and customer-facing applications secure
- Ensure applications are up and running 24 hours a day
- Eliminate the expense of building a private communications infrastructure
- Maximize speed and performance with direct backbone connectivity
- House your own equipment in our environmentally controlled, secure facility
- Increase efficiency through high availability
- Rapidly adjust configurations as your business needs change
- High speed connectivity
- Redundant Back-up Power
- 24 hour Monitoring and Security

Collocation:

Etisalcom collocation services allow you to place your servers and network equipment in our Data Center. Get the big advantage of high speed connectivity, power redundancy, security, optimal environmental facility, monitoring while retaining complete control over your equipment's administration and maintenance at a very affordable price.

Natural disasters and other recent catastrophic events have demonstrated the needs for business continuity planning & redundancy. The costs of downtime due to disaster are far more than financial - downtime can have a negative impact on your customer relationships, supplier relationships, and your company's reputation.

Every business needs this service - it's a cost of doing business and a value for business protection. Collocation allows you to do more for your business, using less of your time and money.

Space available in **BWTC**, **AL-EZZ** Towers and **Almoayyed** Towers.
